

## **WHAT IS THE PERFECT FRANCHISE BUSINESS?**

There are presently 8000 different franchise businesses being offered to the individuals who are seeking to purchase a franchise opportunity. How do you know what is the perfect business for you? If you take a look at our economy and circumstances that surround our present day events, I think you will agree with me that Grafix Stop is the perfect franchise for many.

Look at a business that can be operated from your home or a small industrial park that allows very low rent. With rising gas prices, why travel when you can work from home or very near your home. Grafix Stop can be started in your own home in a garage, spare bedroom or basement. The equipment required to run the business does not take up a lot of room.

Grafix Stop does not require a lot of inventory. Several rolls of paper, fabric, ink and laminates is all that is required. Depending on how much you want to earn monthly will greatly depend on the amount of inventory you will want to back your business up with. Usually \$2,000 to \$2,500 is sufficient.

Grafix Stop does not require employees. The owner can run the business him/her self. If you want to expand your business revenues, you might consider 1 additional worker.

Grafix Stop requires very little marketing. The franchisor teaches franchisees how to acquire stable consistent work using some very simple methods and contacts.

Grafix Stop produces very high profits on products and services. The gross margin can be 500% to 600% and more depending on particular jobs.
